

SCOPE OF WORK

Performance & Tracker Modules

A complete KRA / KPI performance management system, three operational trackers, and targeted enhancements — built directly into your existing ERP & HRMS. **One login, one database, no separate tool.**

DOCUMENT VERSION

v1.0 — Scope of Work

01 • OVERVIEW

What This Proposal Covers

Three separate pieces of work, scoped separately so you can approve them together or one at a time. Everything is built inside the ERP you already run — same login, same roles, same database, same reports engine.

MODULE A

**Performance
KRA / KPI**

MODULE B

**Operational
Trackers**

MODULE C

**System
Enhancements**

A Performance Management — KRA & KPI

- A full performance management system replacing the current simple text-based appraisal inputs
- KRA and KPI masters, goal assignment, performance cycles and an approval trail
- Self assessment, manager assessment and HR moderation with evidence upload
- Automatic scoring, performance bands, bell-curve distribution and reward recommendations
- Two dedicated dashboards, thirteen report types and eight automated notifications

B Operational Trackers

- **Break Sheet Tracker** — employee break in/out with auto-calculated duration
- **Diesel Tracker** — fuel bills, quantity, amount and slip uploads against a monthly budget
- **Daily Visitor Tracker** — office visitors and interview candidates with source tracking
- Each with its own analytics view, Excel import/export and monthly / date-wise / yearly filters

C System Enhancements

- Super Admin identity masked as “System Admin” in the activity log
- Combined leave — apply half Casual + half Sick as one full-day request
- Leave application blocked when the employee has no paid balance left

Already delivered. Three items from your requirement list are already built and working in the current system — the mid-month **budget top-up trail with the exact sanction date, budget edit & delete** for correcting clerical errors, and the **receipt / UTR screenshot upload** on the Record Payment screen. They are listed in this document for completeness and need no further work.

Add-on available. A separate optional annexure at the end of this document covers a **Document & PDF Pack** — appointment letters, experience letters, salary certificates, Form 16, muster roll, delivery challans and more. Scoped separately so it can be taken later.

MODULE A · PERFORMANCE

Dashboards, KRA & KPI

The foundation of the module — what management sees at a glance, and the master data that everything else is scored against.

1 Admin Dashboard ADMIN · HR

- Total Employees, Active KRAs and Active KPIs at a glance
- Pending Goal Approvals and Completed Reviews counters
- Average Performance Score across the organisation
- Department-wise performance comparison chart
- Top Performers and Low Performers lists
- Upcoming Review Dates calendar

2 Employee Dashboard EMPLOYEE

- My KRAs and My KPIs with live progress percentage
- Achievement Score against assigned targets
- Pending Reviews and Manager Feedback inbox
- Performance Trend graph across past cycles
- Rewards & Recognition earned

3 KRA Master — Key Result Areas ADMIN · HR

- Fields: KRA Name, Department, Designation, Description, Weightage, Review Frequency, Manager, Status, Start Date, End Date
- Review frequency options — Monthly, Quarterly, Half-Yearly, Yearly
- Multiple KRAs per employee with a live weightage validator (must total 100%)
- Example set-up: Sales Growth 40% · Customer Satisfaction 20% · Team Collaboration 15% · Learning & Development 15% · Attendance 10%

4 KPI Master — Key Performance Indicators ADMIN · HR

- Fields: KPI Name, Related KRA, Measurement Unit, Target Value, Achieved Value, Weightage, Score Formula, Status
- Measurement units — Number, Percentage, Currency, Hours, Rating
- Multiple KPIs under a single KRA (e.g. Sales Growth → Monthly Revenue, New Customers, Repeat Customers, Conversion Rate)
- Automatic score calculation from target vs achieved, per the configured formula

MODULE A · PERFORMANCE (CONT.)

Assignment, Cycles & Assessments

5 Goal Assignment ADMIN · HR · MANAGER

- Cascade assignment — Admin → Department → Designation → Employee
- Direct assignment to one or many specific employees
- Bulk assign a KRA set to an entire department or designation in one action
- Copy goals forward from the previous cycle

6 Performance Cycle ADMIN · HR

- Configurable cycles — Monthly, Quarterly, Half-Yearly, Yearly
- Cycle open / lock control so scores cannot be edited after finalisation
- Automatic cycle roll-over with review due dates

7 Approval Workflow

- Escalation trail — Employee → Manager → HR → Admin
- Each stage records who acted, when, and their remarks
- Send-back-for-revision at any stage
- Pending-at-my-desk queue for every role

8 Self Assessment EMPLOYEE

- Employee enters Achievements, Challenges, Learnings, Future Goals and Comments
- Evidence upload — PDF, PNG and JPG attachments against each KRA
- Saved as draft until submitted; locked once it moves to the manager

9 Manager Assessment MANAGER

- Rating on a 1-5 scale — 5 Outstanding, 4 Exceeds Expectations, 3 Meets Expectations, 2 Needs Improvement, 1 Poor
- Feedback, suggestions and comments per KRA
- Promotion recommendation and training recommendation flags

10 HR Review HR

- Moderate manager ratings where they are out of line with the department
- Verify performance against attendance, penalty and warning data already in the system
- Finalise the score and generate the appraisal record

MODULE A · PERFORMANCE (CONT.)

Scoring, Rewards & Reports

11 Final Score Formula

- Weighted calculation across all KRAs — $(\text{Sales} \times 40\%) + (\text{Attendance} \times 20\%) + (\text{Behaviour} \times 20\%) + (\text{Learning} \times 20\%) = \text{Overall Performance \%}$
- KPI scores roll up into their parent KRA automatically
- Formula and weightages configurable per department without code changes

12 Performance Bands & Bell Curve

- Score-to-band mapping — 95–100 Outstanding · 85–94 Excellent · 75–84 Very Good · 60–74 Good · 40–59 Needs Improvement · Below 40 Unsatisfactory
- Optional bell-curve distribution — Outstanding 10% · Excellent 20% · Good 50% · Average 15% · Poor 5%
- Band thresholds editable by HR

13 Rewards — Auto Recommendation

- System suggests Salary Increment, Bonus, Promotion, Training or PIP based on the final band
- Recommendations feed directly into your existing appraisal and increment records
- HR can accept, override or reject each recommendation

14 Reports — with PDF & Excel export

Employee Performance

Department Report

Manager Report

KRA Completion

KPI Achievement

Monthly Performance

Quarterly Performance

Annual Performance

Top Performers

Bottom Performers

Appraisal Report

Increment Recommendation

Promotion Eligibility

15 Notifications

- Goal Assigned · Goal Updated · Goal Approved · Self-Assessment Due · Review Due
- Review Completed · Manager Feedback Available · Appraisal Generated · Promotion Recommended
- Delivered through your existing in-app and email notification system, permission-gated per role

16 Role-Wise Permissions

- **Admin** — Create KRA/KPI, Assign Goals, Final Approval, Full Reports
- **HR** — Create KRA/KPI, Assign Goals, HR Review, Full Reports
- **Manager** — Assign Goals, Manager Review, Limited Reports (own team)
- **Employee** — Self Assessment, Own Reports only
- Wired into the existing Roles & Permissions matrix as a new module row

Database. Thirteen new tables — performance cycles, KRA master, KPI master, employee KRA, employee KPI, self review, manager review, HR review, performance score, feedback, documents, history and notifications — all multi-tenant and business-scoped like the rest of your ERP.

MODULE B · TRACKERS

Three Operational Trackers

Three record-keeping registers with role-based access. Every one of them ships with an analytics view, Excel import and export, and Monthly / Date-wise / Yearly filters.

1 Break Sheet Tracker

- Employee Name — dropdown that auto-fetches the Employee ID
- Out Time and In Time — calendar and time picker
- Total Timing — calculated automatically from out and in time
- Break Type and Remarks
- Analytics — average break duration per employee, per department, longest breaks, daily totals

2 Diesel Tracker

- Serial Number / Code, Month, Date, Bill Number, Slip Number, Time
- Quantity and Amount with running totals
- Upload option for the receipt or slip — PDF or image — so every entry is backed by proof
- Monthly budget tracking overview — allocated vs consumed vs remaining
- Analytics — consumption trend, cost per litre movement, month-on-month comparison

3 Daily Visitor Tracker

- Date of Visit, Candidate / Visitor Name, Mobile Number
- Source — dynamic dropdown, HR can add new sources at any time
- Arrival Time and Purpose of Visit — dynamic dropdown
- Called By, Interview By and Availability Status
- Analytics — visitors by source, by purpose, by day, interview conversion view

Included with every tracker. Role-based access so only designated users see each register · Excel import for historical data · Excel and PDF export · Monthly, date-wise and yearly filters · search and sort on every column.

MODULE C • ENHANCEMENTS

System Modifications

Targeted changes to the running system. Three items are chargeable; three more from your list are already built and are shown here so the record is complete.

TO BE BUILT

1 Recent Activity Log — Super Admin Masking NEW

- Actions performed by the Super Admin display as “System Admin” in the Recent Activities log
- The existence of the Super Admin role is hidden from regular admins throughout the interface
- The real identity stays intact in the underlying audit record for compliance

2 Combined Leave NEW

- Employees can combine fractional balances across leave types in a single request — for example 0.5 Casual + 0.5 Sick = one full day
- One request, one approval, correctly deducted from both balances
- Approver sees the split before approving; payroll picks it up correctly

3 Leave Balance Gate NEW

- An employee with no paid leave balance is blocked from submitting a leave request
- Clear message on the form showing the available balance per leave type
- Currently the system allows over-balance requests and lets HR decide the paid / unpaid split — this changes that behaviour

One decision needed from the client. Blocking leave when the balance is zero also stops an employee from applying for genuine **Leave Without Pay** — for example a medical emergency after balances are exhausted. We will build this as an **on / off setting** so HR can allow an LWP request as an exception. Please confirm whether the block should be absolute or allow an LWP exception.

ALREADY BUILT & LIVE

4 Budget Addition Trail DELIVERED

- Mid-month top-ups are recorded with the exact sanction date, amount, note and the admin who added them
- The budget total increases from that date forward instead of appearing as if allocated on the 1st

5 Budget Edit & Delete DELIVERED

- Authorised users can edit or delete a budget entry to correct a mistyped amount
- Individual top-up entries can also be removed

6 Record Payment — Receipt Upload DELIVERED

- Upload field beside Reference / UTR No. on the Record Payment screen
- Accepts PDF, JPG and PNG up to 5 MB — bank slip, cheque scan or UPI screenshot
- Receipt viewable from the payment list, detail and edit screens

ANNEXURE · OPTIONAL

Document & PDF Pack

A separate, optional pack of 42 printable documents the ERP does not generate today. Every pack can be taken on its own — the foundation is required only if you take at least one pack.

Letterhead Foundation

One shared letterhead, footer and page-numbering layout, authorised-signature and company-seal upload, amount-in-words in Indian format, and DRAFT / PAID / CANCELLED watermarks. Required once if any pack below is taken.

HR Letters Pack 9 DOCS

Appointment Letter · Confirmation Letter · Experience Letter · Relieving Letter · Salary Certificate with CTC annexure · Warning Letter · Show-cause Notice · Employee ID Card · Full & Final Settlement

Payroll & Statutory Pack 5 DOCS

Form 16 annual tax statement · PF / ESI / PT statutory register · Bank transfer advice · Salary register · Bulk payslip download for the whole company

Attendance & Leave Pack 6 DOCS

Monthly attendance register / muster roll · Daily attendance report · Leave card with balance statement · Leave sanction slip · Comp-off approval slip · Regularization approval slip

Sales & Finance Pack 8 DOCS

Sales Order · Payment Receipt · Goods Receipt Note · Delivery Challan · Customer Statement of Account · Vendor Statement · Stock Ledger · Credit / Debit Note

Reports & Modules Pack 14 DOCS

Five HR report PDFs · Reimbursement voucher · Requisition approval note · Budget vs actual statement · Service job card · Helpdesk report · CRM pipeline report · Asset gate pass · Asset depreciation schedule · Report Builder PDF export

Full Document Pack — all 42 documents

Already working today. The ERP already generates 16 PDFs today — Quotation, Proforma Invoice, Tax Invoice, Expense Voucher, five business reports, Payslip, Appraisal / Increment Letter, Offer Letter, Recruitment Funnel Report, Asset Register, Asset Assignments and Asset Maintenance Log. Six of these attach themselves automatically to outgoing email.

03 • DELIVERY PLAN

Phases & Terms

Phase 1 — Foundation & Masters**Week 1-2**

Database structure, performance cycles, KRA master, KPI master, weightage validator and the role permission matrix.

Phase 2 — Assignment & Workflow**Week 2-3**

Goal assignment by department, designation and employee; the Employee → Manager → HR → Admin approval trail with send-back and pending queues.

Phase 3 — Assessments & Scoring**Week 3-5**

Self assessment with evidence upload, manager assessment, HR review and moderation, scoring engine, performance bands, bell curve and reward recommendations.

Phase 4 — Dashboards, Reports & Alerts**Week 5-6**

Admin and employee dashboards, thirteen reports with PDF and Excel export, and the nine automated notifications.

Phase 5 — Trackers**Week 6-8**

Break Sheet, Diesel and Daily Visitor trackers with analytics views, receipt uploads, Excel import / export and all filters.

Phase 6 — Enhancements, QA & Handover**Week 8-9**

Super Admin masking, combined leave, leave balance gate, full testing across all roles, deployment and team training.

Everything stays in one system. The performance module scores against the attendance, penalty, warning and appraisal data your ERP already holds — no double entry, no separate login, no data export between tools. The trackers use the same employee master, the same roles and the same export engine as the rest of the platform.

04 · SIGN-OFF

Notes & Approval

Scope confirmation for the modules described in this document.

- Includes 30 days of free bug-fix support after handover.
- Includes one round of UI feedback per module during development.
- Report formats, letter wording and dropdown values to be confirmed by the client before the relevant phase begins.
- Anything outside this document is treated as a change request and scoped separately.
- Commercial terms are covered in a separate quotation document.
